## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant:

Enrique David Sancho

Serial No.:

09/500,601

Filed:

February 8, 2000

For:

System and Method for Secure Network Purchasing

Hon. Commissioner of Patents and Trademarks Washington, D.C. 20231 RECEIVED. AUG 2 8 2002 GROUP 3600

Sir:

Enclosed is a copy of an Office Action that issued in U.S. Application Serial No: 09/500,601 as well as the cited patents. Also enclosed is a copy of U.S. Patent 6,026,166 which applicants recently became aware of.

Respectfully Submitted,

Thomas A. O'Rourke

Reg. No. 27,665

Wyatt, Gerber & O'Rourke 99 Park Avenue 6th Floor New York, N.Y. 10016

#### **DETAILED ACTION**

Claims 1-4 have been examined

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "fingerprint programming" is unclear, since there is not resolution of this term within the specification

Claim 3 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "buyer computer requesting to purchase merchandise to said vendor server" is unclear.

Claim 4 recites the limitation "MC". There is insufficient antecedent basis for this limitation in the claim.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-2 are rejected under 35 U.S.C. 102(e) as being unpatentable over Gottfried (US Patent 6,270,011)

As per claim 1,

Gottfried ('011) discloses a system for performing a secured transaction between a buyer's PC, a vendor server, a creditor server and a security server, wherein said buyer's PC has received fingerprint programming from said security server. (column 3, lines 26-32, also figure 6)

Art Unit: 3621

Gottfried ('011) discloses a system for performing a secured transaction according to claim 1, wherein said buyer's PC has received encryption programming and decryption programming from said security server.(column 6, lines43-58)

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ronin et al. (US Patent 5,905,736) in view of Gottfried (US Patent 6,270,011).

As per claim 3,

Ronin et al (736) discloses a method for performing secure electronic transactions on a computer network, said network comprising a buyer's computer, a vendor server, a creditor server and a security server, said buyer's computer having a fingerprint file stored in the memory thereof, including the stops of:

buyer computer requesting to purchase merchandise to said vendor server, said purchase request including said buyer computer's IP address; (figure 1)

buyer computer selecting a predetermined form of secured payment method; (figure 1, also column 6, lines 25-29)

payment method selection causing said vendor server to transmit to said security server a request for confirmation of said buyer computers identity at said buyer computer's IP address; (figure 3, label 211)

Ronin et al (736) does not specifically discloses said confirmation request causing said security server to send a retrieval request to said IP address, said retrieval request including a retrieval program for detecting and retrieving said buyer's computer's fingerprint file, and said retrieval request further comprising a response request asking for confirmation of said purchase request; whereby a positive response from said buyer's computer to said security server accompanied by said fingerprint file causes said security server to confirm said buyer computer's identity to said vendor server and to approve said purchase. Gottfried ('011) discloses said confirmation request causing said security server to send a retrieval request to said IP address, said retrieval request including a retrieval program for detecting and retrieving said buyer's computer's fingerprint file, and said retrieval request further comprising a response request asking for confirmation of said purchase request; whereby a positive response from said buyer's computer to said security server accompanied by said fingerprint file causes said security server to confirm said buyer computer's identity to said vendor server and to approve said purchase.

(column 3 lines 26-37)

Application/Control Number: 09/500,601

Art Unit: 3621

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the Ronin et al. method with the Gottfried ('011) method in order to perform secure electronic transactions on a computer network that wer everified by a users fingerprint because fingerprint identification is difficult for the average user to forge.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ronin et al. (US Patent 5,905,736) in view of Official Notice.

As per claim 4,

Ronin et al (736) discloses a method of performing secure electronic transactions on a computer network, said network comprising a buying computer, an ISP computer and a vendor computer, Including the steps of;

said ISP computer assigning to buying computer a Buyer-ID code and IP

address; (column 2, lines 8-13)

said buying computer communicating via said ISP computer with said vendor computer and allowing an operator fo select merchandise or services for purchase; (Figure 1, also column 4, lines 20-29)

said Buyer-ID and buyer computer's IP address are provided to vendor computer programmed to request and receive said information; (column 5, lines 18-24)

vendor computer is programmed to use Buyer-10 and BC's current IP address along with Information such as desired Item ID, cost and name for generating an electronic purchase inquiry which is transmitted to ISP computer; (Figure 3, label 223)

whereby if buyer computer Is determined to be connected to ISP computer at correct address, ISP computer then generates and transmits Transaction Confirmation Number and instructs MC to generate and forward invoice to a ISP computer. (Figure 2, label 217)

Ronin et al (736) does not specifically disclose ISP is programmed such that upon receipt of purchase inquiry from MC, ISP uses combination of IP address and Buyer-ID to determine within ISP'S internal network whether Buyer is in fact still online at the address assigned at the beginning of the online session;

Official Notice is taken that "ISP is programmed such that upon receipt of purchase inquiry from MC, ISP uses combination of IP address and Buyer-ID to determine within ISP'S internal network whether Buyer is in fact still online at the address assigned at the beginning of the online session" is common and well known in prior art in reference to online transactions. It would have been obvious to one having ordinary skill in the art at the time the invention was made to determine that the buyer is online at the address assigned at the beginning of the online session because the transaction cannot be completed otherwise.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bogosian Jr. (US Patent 5,513,272).

## Attachment for PTO-948 (Rev. 03/01, or earlier) 6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

## INFORMATION ON HOW TO EFFECT DRAWING CHANGES

#### 1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson. MUST be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings MUST be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

## Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in ABANDONMENT of the application.
